Projekt description

The **Bookings** Android app is designed to make it easier, faster and smarter for you to book our special offers at our hotel. The app creates an interface between you and us, saving you the hassle of long phone calls. Our app gives you an overview of the activities and rooms we have to offer. You can get a good overview without much effort by simply registering and making the booking of your choice. Are you still looking for a room for your next trip or do you have no idea where to hold your next event? Or are you just looking for relaxation or action?

Bookings has something for everyone. Because as you know, the **customer is king!**
